Brief details of the event highlights: India's first Education Policy was passed and implemented in 1986. After thirty-four years, the National Education Policy (NEP) for India has been updated, revised and approved on July 29, 2020. Mr. Chakit Swarup Said "After 34 years here we are with a new policy but the same vision to make India a global leader in education sector. Now the focus has shifted to reintroduce education in a way so that there is a symphony in industry and academia. Knowledge driven education is now being integrated with experiential learning and that is definitely going to be a turning point. Now research funding and govt. support is being given to public and private educational sector alike and that will bring

surplus returns in the near future”The National Education Policy 2020 envisions a contemporary education system that foresees to contribute directly to transform our nation sustainably into an equitable and vibrant knowledge society, by providing high quality education to all. This Policy envisages creation, transmission, use and dissemination of knowledge as a part of the continuum. The NEP is ambitious and futuristic but much of its success will depend on how it is executed. There is a need to create awareness about NEP amongst teachers, students, officials, and other stakeholders in the higher education system so that we can together help India in becoming a knowledge superpower. To enhance the moral, ethics, and quality of education we as academic leaders are committed to provide constant guidance to our academic fraternity and inspire them to join hands for making this NEP a grand success. Therefore by adopting ICT for next generation as socially responsible leaders we hereby abide to the UGC Quality Mandate for improving the quality in Higher Education Institutions and therefore under the UGC guidance further are organizing an Online Conference for spreading awareness regarding NEP 2020 referring to point 5 of the notification. This Conference holds the vision of engaging academic fraternity in meaningful assignment along with spreading awareness regarding NEP which will contribute towards the intellectual wealth of the nation.

The session ended with a Q&A session, giving the participants opportunity to clarify their doubts about entrepreneurship. The session was concluded with vote of thanks by Dr. Puneet Chandra Srivastava, Dean, EII-RKGIT, and Ghaziabad.

REC

Innovation

Innovation, i.e., doing something new or something different is a necessary condition to be called a person as an entrepreneur.

The entrepreneurs are constantly on the lookout to do something different and unique to meet the changing requirements of the consumers.

Entrepreneurship

Origin of Entrepreneurship

The term entrepreneurship is derived from a French word "Entreprendre" which means 'to undertake', 'to pursue opportunities', or 'to fulfill needs and wants through innovation and starting businesses'. The word first appeared in the French dictionary in 1723.

Definition of Entrepreneurship

The Robert D. Hisrich and Michael P. Peters (1998) said, "Entrepreneurship is the process of creating something new with value by devoting the necessary time and effort, assuming the accompanying financial, psychic and social risks and receiving the resulting rewards of monetary and personal satisfaction and independence."

Therefore, entrepreneurship entails missionary efforts that involve risks to innovate something of value from wh... financial and psychic rewards.

REC

National Education Policy 2020

- 2. It aims to achieve 'universal foundational literacy and numeracy' in primary schools by 2025. For this, the Ministry of Human Resource Development shall set up a National Mission on Foundational Literacy and Numeracy.
- 3. Public and private schools – except the schools that are managed, aided or controlled, by the central government – will be assessed and accredited on the same criteria, benchmarks, and processes.
- 4. The Gross Enrolment Ratio from preschool to secondary education should be 100 per cent by 2030. (GER is defined as the ratio of the total enrolment in education – regardless of age – to the official population in a given school year, expressed as percentage.) The policy states that universal participation in schools shall be achieved by tracking students and their learning levels to ensure they are enrolled and attending school, and have suitable opportunities to re-join or catch up at school in case they have dropped out or fallen behind.
